alphatronics - Introducing the first 12V/24V mobile television with 4K technology!

Nuremberg (Germany), November 10th, 2023 - alphatronics is setting new standards in the world of mobile entertainment electronics and proudly presents the first mobile television equipped with advanced 4K technology, operable with both 12V and 24V.

The first mobile television with 4K technology

Enjoy your favorite series and movies in stunning 4K quality, even when you're on the go! The smart TV SLA32W4K from alphatronics is exactly what you need for an unparalleled TV experience while traveling.

The first mobile television with 4K technology is exclusively available in the size of 32 inches. It features a high-quality UHD wide-angle panel with a resolution of 3840 x 2160 pixels. An outstanding feature of this model is the support for a broad voltage range from 11 to 28 V DC, enabling operation with both 12V and 24V.

This innovative device is not only equipped with a triple tuner for DVB-S/S2, DVB-T/T2, and DVB-C but also offers CI+, HbbTV, and the intuitive webOS Hub operating system. Control is made easy with the Magic Remote, equipped with

voice control and AirMouse functions, providing a seamless user experience. Additionally, the television is equipped with Bluetooth® 5.0, two USB ports, and two HDMI™ ports for comprehensive connectivity options. A new feature is the optical audio output (SPIDF / Toslink), facilitating easy connection to digital soundbars, headphones, or hearing aids.

Advanced Features

Experience advanced features such as PVR Recording, Timshift and Apple AirPlay.

The PVR recording function allows you to record your favorite shows and play them back at your convenience. With the Timeshift function, you can enjoy TV entertainment on your own terms by pausing, rewinding, and fast-forwarding whenever you like. With Apple AirPlay, you can effortlessly stream content from your iPhone to our devices.

Transform your entertainment experience in your leisure vehicle with the new mobile television featuring 4K technology from alpatronics!
